SAP Intelligent Document Management, With GADA-i on Azure

We ENHANCE and EXTEND SAP Document Management

SAP + (mouse logo) + **GADA_i**

Index

encamina

Current SAP Archiving Systems

Companies are demanding that SAP document management (SAP ERP and SAP S/4HANA) **evolves to open storage systems** within the powerful cloud world.

Thanks to the Chameleon connector, GADA-i becomes the ideal intelligent **SAP archiving** and **documentation** system on **Azure**.

ENCAMINA, together with NOVIS EUFORIA, proposes an alternative solution to archive documents from the current SAP file server in a repository that **guarantees the integrity** and **security of the documents** in an **independent**, **quick**, and TOTALLY **automated** way.

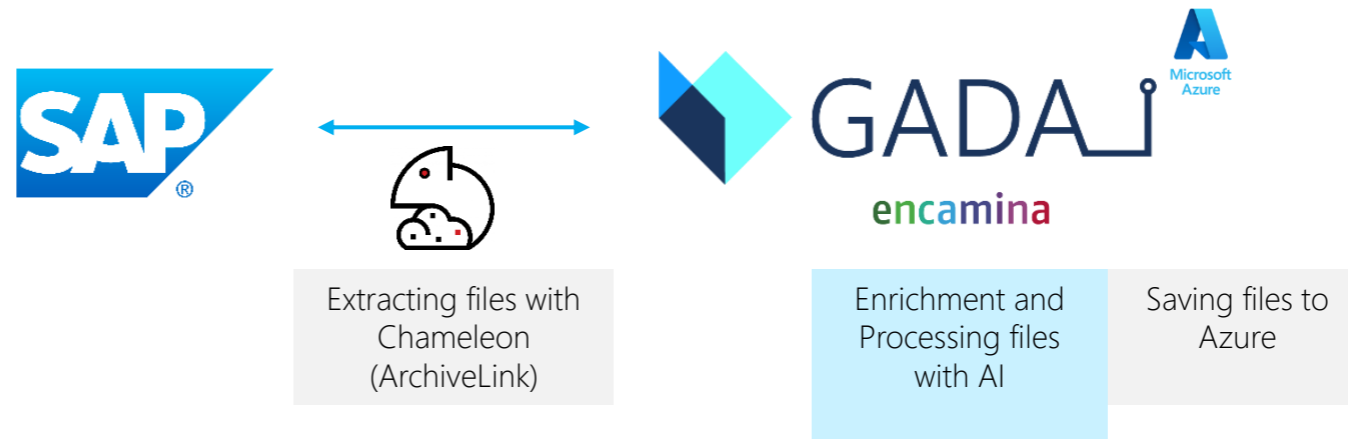

Generic Object Services (GOS)

Record Management

Business Document Management

Document Management System (DMS)

ENCAMINA + NOVIS EUFORIA Join Forces to Connect SAP to GADA-i

- **Chameleon and ENCAMINA have developed GADA-i + SAP:**
  - A connector between GADA-i and SAP that communicates natively via ArchiveLink, supporting all SAP document processes:
    - Generic Object Services
    - Record Management
    - Business Document Management
    - Document Management System (DMS).

- Chameleon **enriches ArchiveLink features**, adding the possibility to manage documents stored in GADA-i and Azure in an agile, integrated and enriched way.

Extracting files with Chameleon (ArchiveLink)

Enrichment and Processing files with AI

Saving files to Azure

# How is the connection between GADA-i and SAP made?

Chameleon is the answer

Enrichment

For each **GOS object** (generic object services), Chameleon **creates a section in GADA-i**, in which it stores the corresponding documents

This allows documents to be **better organized** within the **virtual hierarchical structure of GADA-i.**

- *Document Management System*

SAP

Consumption

Chameleon **enriches** the ArchiveLink functionalities, adding the possibility of managing in an **agile**, **integrated** and **enriched way the documents stored in GADA-i and Azure.**
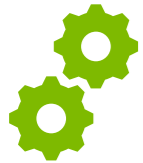

encamina

SAP Connection Example

GADA-i establish the connection without modifying any existing customizations

Usage Scenarios

- Thanks to the flexibility of GADA-i in configuring the periodicity with which documents are saved, there are two main scenarios:

Continuous Dumping

Automated and continuous document dumping when specific business rules configured by administrators are met.

Document Archiving

When documents have a retention time or meet a specific business rule and it does not make sense to keep saving them in SAP occupying memory (documents older than 10 years).

+ GADA_i

GADA-i Features for SAP Thanks to Chameleon and Azure

SAP®

encamina

Outstanding features provided by the connector to SAP

Archiving of documents—ArchiveLink—and files—SAP Archiving—**on the Azure storage medium used by GADA-i.**

Immediacy:
Minimal, quick, and easy configuration to enable a cloud repository in SAP within minutes.
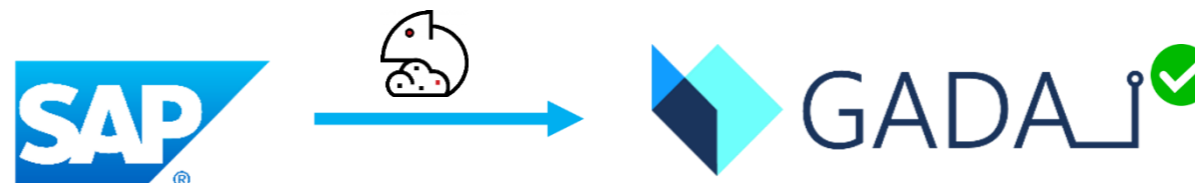

High performance in ArchiveLink and Archiving scenarios

Grouping of documents with parameterizable criteria

Full traceability of access—reading/writing—to stored documents or files.

SAP → **GADA_i** ✓

encamina

Outstanding features provided by the connector to GADA-i

According to the criteria defined in the metadata, access to non-SAP users and users from any other corporate system to the stored documents.

Storage capacity in different repositories: long-term, cold storage, GDPR-compliant, deep archive.

Reduction of costs and complexity of file storage.
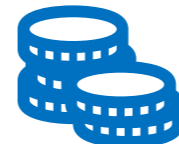

Unlimited storage space at a low cost.

Storage of documents together with their metadata that can be parameterized from SAP.

GADA → SAP

encamina

Why Choose GADA-i + SAP

It does NOT affect other partners' configurations or developments.

GADA-i + SAP connects to SAP without modifying or altering any previously developed customizations.

Improved Document Management

Improved organization of accompanying documentation and SAP optimization.

Access from any system

Permanent access to digital documentation, from anywhere and without the need to access SAP.

Data Loss Prevention

GADA-i + SAP minimizes the risk of data loss thanks to the implementation of automated processes

Cost Reduction

Reduction of the costs associated with the administrative tasks of manual insertion of accompanying documentation in the different processes.

encamina

Implementation of GADA-i, Intelligent Document Management for SAP
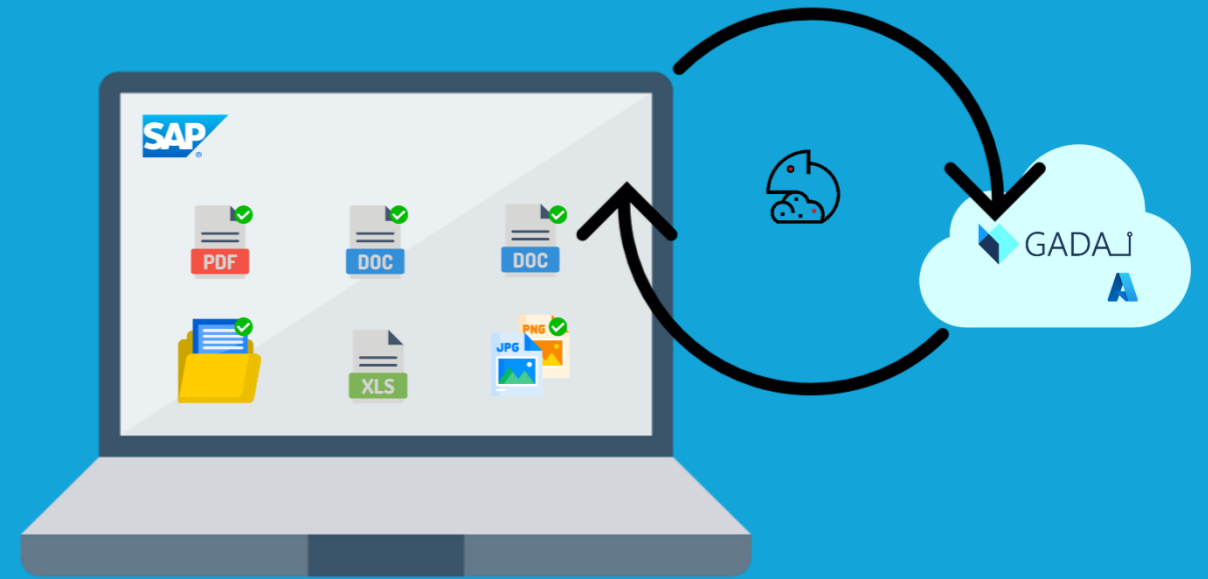

With GADA-i, ENCAMINA offers you the possibility to connect/integrate your SAP digital archiving system with the full power of the AZURE cloud.

encamina

Implementation of GADA-i, Intelligent Document Management for SAP

Chameleon does not affect **configurations or developments of other SAP suppliers** in the specific implementation of SAP ERP and SAP S/4HANA in which it will be parameterized.

GADA-i is a 100% cloud-based service **on Microsoft Azure and can either be hosted on the tenant itself or delegated to ENCAMINA**

Chameleon is a SaaS cloud service that does not require hosting on the tenant.

The GADA-i Intelligent Document Management service integrated with SAP **has a very agile implementation** that includes, in addition to **a slight parameterization of Chameleon within SAP**, the migration of documents to their new location on the Azure cloud within GADA-i.

Why choose ENCAMINA?

Reasons to work with ENCAMINA

✅ **WHY WE ARE RELIABLE:**

- Currently, as a Microsoft Priorized Managed Partner with 11 gold competencies, five silver, three advanced specialisations, 100 technical certifications, 4 MVPs and 1 Regional Director, it is a reference that ENCAMINA is one of the most recognised consultancies by Microsoft worldwide, for its talent and know-how.

-

- 21 years of life as a technological consultant in continuous progression validate the market's confidence and talent. More than two decades mean experience and consolidation together with freshness and innovation.

-

🚀 **WHY WE ARE DIFFERENT:**

- Deep coherence, alignment and conviction with our Values and our purpose as a company.

- ENCAMINA Thinks of Colors, like a contagious attitude in its customers.

Differential factors

Specialist team

The proposed human team has a large number of certifications and is composed of top-level professionals, recognised at the national and European level

Methodology

An agile and robust methodology that seeks to manage expectations, deliver promptly, and maximize satisfaction

Proactive project management

Robust and effective project management, with particular emphasis on the adequacy of the project to your needs, without forgetting the objective of meeting the milestones set and obtaining a result according to expectations.

Experience and references

The experience and references of ENCAMINA in this type of project, as well as of other nature, related to the technologies used

Value deliverables

Not only is it intended to give a solution to the current moment, but adapted integrated with your expectations and scalable with the growth of the company and M365

Coherent and workable roadmap

Based on our experience and the needs expressed in the previous phases
