

Microsoft Azure at the service of your documents with GADA-i

Manage your document lifecycle automatically with artificial intelligence

Solution Overview

GADA-i is a product consisting of a set of Azure cloud services that help classify, archive, and recover files and documents automatically, thanks to Azure's artificial intelligence.

It has an intelligent search engine that allows you to swiftly search and find documents by any of their contents, making them available whenever you need them.

GADA-i is integrated with current storage and management systems (Salesforce, SAP, Dynamics 365, SharePoint, FileNet, etc.), being able to download from these systems documents without active collaboration or that are less used but can be recovered quickly and securely.

Common problems in the industry

- Cost overruns in the document management system
- Performance issues
- Information silos (multiple document sources/repositories)
- Manual and inefficient document lifecycle management
- Poor lifecycle management.
- Accumulation of documents.

Document lifecycle

Benefits

- Classification, profiling, alerts** from the document with ML / CS
- Integration using APIs**
- Document lifecycle** management
- Applies **automatic security policies and rules**, with traceability of all accesses
- Data indexing system for searches.
- GADA-i is **based on Azure services**, well-known technology and guaranteed by Microsoft

SUPPORTED FILE TYPES

- .CSV, .EPUB, .HTML, .JSON, .PDF, .XML, .Zip, .GZ (formato comprimido)
- .KML (XML for geographic representations).
- Microsoft Office: DOCX/DOC/DOCM, XLSX/XLS/XLSM, PPTX/PPT/PPTM, MSG (Outlook emails), XML (both 2003 and 2006 WORD XML).
- Open document formats: ODT, ODS, ODP
- Images: png, jpg, gif, tiff, svg, eps, BPM.
- Videos and music: mp4, avi, mov, mp3, wav.

CUSTOMERS & AUDIENCE

- **Industries:** Banking, Insurance, Lawyers, Logistics
- **Size:** Top SMB, Corporate y Enterprise/Grupos.
- **Technologies:** SharePoint, SAP, Documentum, Salesforce, Docuware.
- **Other:** High volume of documents, multiple data sources.
- **Audience:** CIO, CTO, Modern Workplace manager.

AZURE AVERAGE CONSUMPTION

**~1.700 €
Monthly
(60 TB)**

- Conversion of document manager licenses to Azure consumption.
- Azure IP Co-Sell solution (available).
- Lever for Azure PaaS .
- Better use of SharePoint.
- WAF aligned architecture.
